

## **TCR International successfully implement ELC (Equipment Life Cycle) of Dysel.**

Based on Microsoft Dynamics ERP software, the Dysel ELC solution supports all the business processes of TCR International operations. After a period of successfully teaming with TCR's staff and implementing team TCR now is live with the ELC solution.

TCR International is Europe's leading provider of turnkey solutions for aviation Ground Service Equipment (GSE), and offers expertise in GSE rental and operational leasing, maintenance and fleet management. TCR is headquartered in Brussels, Belgium and operates at 50 airports in seven countries throughout Europe.

TCR's rental offering enables GSE operators to improve the efficiency of their ramp handling services, and is the only leading GSE company offering a unique and comprehensive range of GSE services that supports customers in a vital aspect of their ground handling processes: the use and operation of their GSE.

### **About TCR International:**

TCR's customer base consists of Europe's largest handling companies, airlines, integrators and cargo handlers. TCR now manages over 10,000 pieces of GSE and is staffed with over 400 dedicated professionals. TCR's mission is to be the leading provider of innovative turnkey solutions for Ground Support Equipment Services, and use its in-sourcing expertise and IT systems to add significant value for our customers while creating sustainable value through its people and their enterprising spirit. TCR believes that the success of any ground handling business is largely determined by how efficient the business manages the complex process of operating its ground support equipment. Optimal usage of GSE delivers maximum business returns. For more information: [www.tcr-group.com](http://www.tcr-group.com)

### **About Dysel ELC:**

Dysel, a Microsoft Gold Certified Partner, developed a comprehensive software solution, Equipment Life Cycle™ (ELC), for companies that buy, sell, rent, install, service, maintain and manage serialized Equipment, Machinery and or Fleets. ELC was designed and developed to simplify all the processes that follow a piece of equipment from cradle to grave. ELC is a PROVEN Microsoft Dynamics NAV-based solution that is being used around the world for both large and small customers. The solution is exclusively endorsed by various multinationals for their dealer network worldwide.
